Leul Tesfaye

Full-Stack Engineer

Addis Ababa, Ethiopia · leultesfaye0755@gmail.com · +251 972 690 755
github.com/lulacoder

EXPERIENCE

Full-Stack Engineer · Jirtuu Software Labs

- Joined the team as a full-stack engineer after a five-month internship. Led frontend and backend work, from database and API development through deployment.
- Helped the team adopt reusable instructions for AI coding tools and agents that review code changes.

Freelance Full-Stack Developer · Tripways Hotels

- Built and deployed the hotel booking platform across web and mobile. The React web app and React Native app share room inventory and bookings through Convex.
- Integrated Chapa payments with Convex. The backend initiates payments and processes webhook confirmations to update payment records.

SELECTED PROJECTS

Kenna Gifts
Built the admin frontend in React and TypeScript, connecting it to a NestJS API. Added corporate onboarding, user management, dashboards, and role-based access controls.

FixMyAddis
Contributed to the Next.js web app and NestJS backend for a civic reporting service. Residents can track reported issues, and city staff can assign work by location.

Visit Oromia
Redesigned and rebuilt Oromia's tourism website in Next.js. Integrated Strapi so editors can publish destinations, travel stories, and digital tours.

TECHNICAL SKILLS

Languages TypeScript, JavaScript, Python, SQL
Web and mobile React, Next.js, React Native, Expo
Backend and data Node.js, NestJS, Convex, PostgreSQL

EDUCATION AND CERTIFICATION

Bachelor of Software Engineering · Addis Ababa University · Expected June 2027
Machine Learning Specialization · Stanford University via Coursera · August 2025
